Experience

Katonic AI

Full Stack Engineer

Remote

Jun 2026 – Present

- Lead developer of the [katonic.ai](#) and [eshal.ai](#) websites: a 90+ page Katonic site and eshal.ai, with client and career forms, email notifications, Google Analytics, Tag Manager and SEO; **cross-browser compatible, secure, responsive**.
- Full stack engineer on the **Docs, Developers and Distributor** portals: improved frontend and backend, fixed technical issues, met development standards, and deployed with the DevOps team (**GitHub Actions CI/CD**, Docker).
- Built the **docs and learning experience**: full platform docs with screenshots, around **115 demo videos and tutorials**, automated product videos, and an **Ask AI** section answering through the **Eshal API** plus a chatbot.
- Developed [learning.katonic.ai](#): integrated training videos, **role-based access** for user groups, and learning paths.
- Delivered work for enterprise partners: worked with the **TAS Networks, HPE, Red Hat and NVIDIA** teams on product demo videos, documentation and platform content, and answered their queries with technical support.
- Owned delivery end to end across frontend, backend, integrations, analytics, access management and deployments.

Full Stack Engineer Intern

Dec 2025 – May 2026

- Shipped 6+ production-grade full-stack apps with **Next.js, TypeScript, Node.js, MongoDB, REST APIs, JWT**.
- Developed the **V2 and V3 Katonic websites**, leading their development and maintenance.
- Integrated **Claude and LLM APIs** for AI-powered document generation, presentations and enterprise automation.
- Worked with DevOps on deployments using **Docker** and **GitHub Actions**; set up **GA4** and **GTM** for SEO and analytics.

KPIT Technologies

Jan 2025 – Nov 2025

Intern

Remote

- Completed KPIT's **NOVA Skill-1 (C++)** and **Skill-2 (Java)**, solving **150+ problems** and clearing coding marathons.
- Built OOP-based mini-projects such as a **Car Functionality System**, gaining hands-on OOP, debugging and Git experience.

EDUCATION

JSPM Rajarshi Shahu College Of Engineering, Tathwade, Pune

2021 – 2025

B.Tech - Computer Science and Engineering - CGPA - 7.5

Pune, Maharashtra

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, C++, SQL, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS, responsive and cross-browser UI, SEO

Backend & APIs: Node.js, Express.js, REST APIs, JWT authentication, Prisma, Razorpay, Web Push, Claude and LLM APIs

Databases: PostgreSQL (Neon), MongoDB, MySQL, Supabase, Firebase

DevOps & Cloud: Git, GitHub Actions (CI/CD), Docker, Vercel, GitHub Pages

Testing & Analytics: Vitest, Postman, Google Analytics (GA4), Google Tag Manager

Strengths: client handling, customer success, product demos, technical documentation, marketing support, authentication and RBAC, data encryption, AI-assisted development

PROJECTS

Visitzee – Online Booking Platform for Local Businesses

2026

Live: [Website](#) · [Owner dashboard \(try demo\)](#) · [Customer booking page](#) | **Stack:** Next.js, TypeScript, PostgreSQL, Prisma

- **Built and launched end to end, solo:** a booking platform for salons, clinics, trainers and similar businesses in **India and the US**. Each business gets its own web address, photos, team, hours and map.
- **Effortless for customers:** pick a service, person and time, then get an **email confirmation with a calendar file**, a **day-before reminder** and a private link to **cancel or reschedule**. **No double bookings**, even if two people book at once.
- **Powerful for owners:** day calendar, walk-in bookings, **repeating appointments**, holidays, staff logins (each sees only their own bookings), customer notes, CSV import, and **revenue and busy-time reports**.
- **Fills the calendar:** a **waitlist** that alerts people when a slot opens, **customer reviews** the owner approves, instant **phone notifications** for new bookings and one-tap **WhatsApp** reminders.
- **Secure by design:** customer data is **encrypted** and exportable or deletable (DPDP Act); bot-protected sign-in; **Razorpay**.
- **Production quality:** **650+ automated tests** and automatic deploys via **GitHub Actions** and Vercel, verified live.

LaunchLens AI – Startup Idea Validation Platform

2026

Live: [launchlensai.vercel.app](#) | **Stack:** Next.js, TypeScript, Tailwind CSS, AI APIs

- **Turns an idea into a plan:** enter an idea, get **market research, competitor analysis and an MVP roadmap**.
- Uses **AI APIs** to produce structured reports with a **revenue model, risk analysis and go-to-market strategy**.
- Designed a fast, responsive interface with **Next.js, TypeScript and Tailwind CSS**.
